

iGT UNC / iGT INC Consultation Response

Date	6 December 2007
Reference	iGT011 DMR
Title	Timing of Calculation of Estimated Meter Readings by Pipeline Operator
Respondee	Marie Clark - ScottishPower Energy Management Ltd
Position on the Modification	Support Modification
Facilitation of the relevant objectives	
<p>We believe that this modification proposal would further the relevant objectives as defined within SSC A11 (d) of the Gas Transporters Licence as follows: -</p> <p>Estimated Meter Readings produced by Pipeline User will in the absence of a valid opening meter reading being provided by the Registering User, be calculated as though a Meter Reading had been obtained on the Supply Registration Date. We believe that this will provide greater accuracy of transfer date readings and as a result will enhance the Change of Supply process. Consequential improvements will occur to supporting Industry processes such as AQ Review and the requirement to enter into Shipper Agreed Reads.</p> <p>Implementation of this Modification will result in greater accuracy of Change of Supply Meter Readings and therefore promote greater efficiency and the promoting of competition between relevant Shippers and Suppliers.</p>	
Additional Information and Comments	
We confirm that we support the proposed Legal Drafting provided with the DMR.
