

## iGT INC Draft Modification Report Response

<b>Date</b>	15 January 2008
<b>Reference</b>	UGI034 GTC0343 GPL042 DMR
<b>Title</b>	Mandatory Use of Defined File Formats for Change of Supply and Change of Supply Meter Readings.
<b>Respondee</b>	Colette Baldwin E.ON UK
<b>Position on the Modification</b>	Do not support Modification
<p><b>Facilitation of the relevant objectives</b></p> <p>E.ON do not believe that this modification better facilitates the relevant code objectives as the modification is seeking to introduce industry file formats into only the GTC/GPL/UGI Individual Network Codes. E.ON believe it would be more co-ordinated, efficient and economic for the iGTs to consider a standard approach to the Change of Supplier process as the large GTs do, and as outlined in the Proposal iGT004 for Standard File formats for the Change of Supplier process. All transporters, shipper/suppliers need to exchange the same information, and so a co-ordinated mechanism would be the most efficient.</p> <p>Since the iGTs have recognised the need to move to an iGT UNC which provides efficiency in administration, it seems incongruous to expand the Individual Network Codes for what is in essence a standard industry process, and surely an iGT UNC modification would be more efficient.</p>	
<p><b>Additional Information and Comments</b></p> <p>For the reasons outlined in our original response to this proposal, we are unable to support this modification.</p>	

Completed forms should be returned to the iGT UNC Representative, Gemserv Ltd at [iGT-UNC@gemserv.com](mailto:iGT-UNC@gemserv.com) or faxed to 020 7090 1001
